2016-2019

Team becomes RMU VR46RA

2022?

IT'S TIME TO

4.
FUTURE

GET DIRTY.

4.
FUTURE

MOTOCROSS

"There is a medicine that makes us feel good, makes us more beautiful, makes children grow up healthy and is a great excuse to spend time with those we like. It keeps away from bad habits and often from bad company, keeps the heart in shape and keeps away many diseases."

The medicine of miracles is Motorcycling

4.
FUTURE

NEW **PROJECT** FOR THE **GROWTH** OF NEW MOTOCROSS **TALENTS**

RMU and Alessandro Ruozi's project is to repeat the speed operation, transporting all knowledge to the world of Motocross.

The goal is to enhance and raise **young people motorcycling talents** in the Italian motocross championship. The path will boast the experience gained over the years by creating a **team of professionals** dedicated to the new project.

PROGETTO To date, the commitment focuses on the search for the talent of very **young riders**, to be prepared with a technical method in order to transform them into professionals and realize their dreams, both in the world of speed and in that of motocross where commitment, **desire and passion**.

As in 2009, RMU doubled, maintaining the natural passion for the racing world, from speed to motocross. Youth growth will be closely followed in the same all-Italian context that characterizes the RMU

2022 The Italian project of the **RMU MX TEAM** starts, with a single structure for the 65cc, 85cc and 125cc categories, bringing technical solutions that will increase performance both on the bikes and in the growth path of young people who will mark the way in the future in world cup races. A synergy that serves to define and guarantee the generational change and have more **Italian drivers** around the world to represent Italy and the MotorValley, as well as the **RMU made in REGGIO EMILIA**.
